## YOUTHFUL SUICIDES.

A boy of nineteen has shot himself to death because he became disgusted with the hardships of his lot. The last straw added to the scale and which determined him to sulcide was not being able to buy an engagement ring for a girl, two years his junior, with whom he was in love.

This is only one more of several cases of youthful suicide to which the self-destroyers have been moved by irritation or disgust. The levity which marks this solemn act of cutting short one's life is harrowing. The plea that the life of a human being is his own, and when he reaches a point where he prefers death to existence he has a right to procure it by his own hands, is specious but untrue.

There is no courage in this self-inflicted death. It is the petulant rush of a weak soul into what seemed the sole relief. True manliness does not cast off the burden of life because there are trials to be endured. To face them bravely, conquer them if possible, and endure them with

the dramatic character of the act. The poor wretch seems to feel that for one moment he may rivet the world's attention upon himself. The motives for suicide are wholly wrong. Let men endure end wait the dawn of a better day.

## MILVAINE'S CONVICTION.

CHARLES MCILVAINE, the slayer of CHRISTIAN W. LUCA, a Brooklyn grocer, has been convicted of murder in the first degree on his second trial. The plea of insanity, which was relied on for his defense in this second trial, has not happily availed with the jury.

The murder was one of revolting atrocity. McLLvarne broke into the residence of a peaceful, simple-hearted citizen, when he was asleep at night, and killed him before the eyes of his agonized wife without any extenuation. Had the miserable wretch escaped conviction for his crime would have been a deplorable mis- driven out in a year. carriage of justice.

But the second trial has resulted as the first did. The jury have found the accused guilty of murder in the first degree. There is no ground whatever for sympathy in the case. Every feeling of humanity was outraged by this cold-blooded butchery of an unoffending citizen. McILVAINE should receive full measure of justice for his crime. The laws are to protect the law-abiding citizen, not to shield criminals. McILVAINE committed a dastardly murder and should suffer the full consequence of it.

The undertaking has been simplified as much as possible. The object of this census is to secure an accurate knowledge of how many persons there are in the city of New York, and to compare the result with that of the late census. Everything has been so systematically arranged as to promise a speedy and satisfactory result.

I am inclined to think that unions where husband and wife are so near an age are never so happy as where the husband is the senior by six or eight years.
I strongly oppose early marriages and think there would be far happier homes if the young peopls were not in such haste to take the most important step of their lives.

After the most careful observation, I find that a woman marrying a man fifteen or twenty years her senior does so for celebrity, wealth, or, as an old maid preventative. The union may be a peaceful one, but to make it happy the wife should not be more than five years his junior.
